JOSEPH UGALDE

SENIOR SOFTWARE SOLUTION MANAGER

PRODUCT & TEAM LEADERSHIP | CLOUD-NATIVE SOFTWARE | CYBERSECURITY | DATA ENGINEERING

Atlanta, USA - (470) 506 3646 | ugalde.berrocal89@gmail.com | www.linkedin.com/in/josephugaldeberrocal

Natural problem solver and technology orchestrator with 17 years of experience transforming complexity and ambiguity into secure, scalable, and user-focused solutions. I lead cross-functional teams at the intersection of engineering and business, bridging strategic vision with operational execution to drive clarity, alignment, and results across enterprises, departments, and teams. Certified in PMP, CSM/CSPO, Pentest+, Azure, and RPA, I blend broad technical fluency with sharp leadership and business acumen, knowing enough to challenge assumptions and empower teams to succeed. Whether scaling SaaS products, delivering custom solutions, or unblocking operations, I drive outcomes through orchestration, not just execution.

PROFESSIONAL EXPERIENCE

Feb 2022 - Present

Software Solution Manager, Systems X

- Defined product vision and multi-year roadmaps for a multi-tenant, cloud-native SaaS solutions, aligning business goals with technical feasibility. Translated high-level requirements into well-scoped epics, user stories, and acceptance criteria using Jira and Confluence.
- Recruited, coached, and scaled a high-performing technical team; aligned hiring and org design with growth-stage roadmap and client delivery needs.
- Led a cross-functional, distributed Agile team across North America, LATAM, Europe, and Asia; promoted a culture of accountability, collaboration, and iterative delivery.
- Oversaw full Agile lifecycle execution, including backlog grooming, sprint planning, daily stand-ups, reviews, and retrospectives. Applied MoSCoW and RICE prioritization frameworks to optimize backlog health and delivery focus within SOW and contract boundaries.
- Trained engineers, consultants, and customer success teams on Scrum and Kanban methodologies, boosting team alignment and delivery velocity.
- Used velocity tracking and burndown charts to analyze team performance and support forecasting; reduced new-client onboarding time by 15%.
- Managed project P&L, led SaaS cost modeling, and optimized cloud spend to ensure healthy ROI and product margin.
- Directed cloud solution design using Azure Stack to optimize scalability, performance, and cost-efficiency.
- Built and maintained a CI/CD pipeline using GitHub Actions, introducing gated production releases and deployment automation to ensure high availability and release reliability.
- Designed and delivered bidirectional Plex ERP integration APIs using Rockwell Automation environment, reducing manual processing and improving data synchronization across enterprise systems.
- Launched a structured A/B testing framework and UX feedback loop, enabling rapid feature development and faster closure of usability gaps.

Cybersecurity Engineer, Penetration Tester, MICIT **Sep 2021 - Feb 2022**

- Drafted SOW, RoE and NDAs in line with NIST SP 800-115, for web, API and hybrid-cloud penetration tests.
- Combined passive OSINT reconnaissance (Shodan, theHarvester) with active enumeration (Nmap, Wireshark); prioritized assets by CVSS scores and business impact.
- Ran manual assessments with Nmap NSE, OpenVAS and Burp Suite; normalized CSV/JSON results, weeded out false positives and pushed verified findings to DevSecOps to work on remediation.
- Exploited OWASP Top 10 flaws using Python/Metasploit payloads and SQLmap/XSStrike scripts to demonstrate IDOR, SSRF and Log4Shell-style exploits.
- Produced executive and technical reports that mapped findings to MITRE ATT&CK, included SBOM updates, and outlined actionable remediation playbooks; briefed managers, senior leadership, and audit teams to accelerate fix cycles.

Software Engineer, Custom Development & Automation, IBM **Feb 2018 - Aug 2021**

- Kaizen-driven automation engineer supporting IBM Global Consulting; partnered with consultants on 5 continents to surface workflow bottlenecks and ship high-impact software solutions and fixes.
- Owned the full SDLC—requirements, architecture, hands-on coding, testing, and production release—working in two-week Agile/Scrum iterations.
- Shipped 20 + full-stack apps using Python, Django and Bootstrap, enabling multi-user collaboration and cutting process cycle time up to 75%.
- Replaced spreadsheet workflows with data-driven web apps and interactive dashboards (Pandas, NumPy, Plotly), reclaiming 150K + labor hours annually.
- Built cloud-native applications & RESTful services on IBM Cloud; automated pipelines with GitHub Actions CI/CD for zero-downtime deployments.
- Engineered scalable data layers (SQL Server, MySQL, PostgreSQL); ERD optimization and index tuning to reduce query latency.
- Elevated code quality & reuse via PR reviews, integration tests, and modular OOP designs, accelerating new-project ramp-up 30%.

Automation and Analytics Manager, IBM **Aug 2014 - Jan 2018**

- Built and Led a High-Impact Analytics department: Founded and scaled a 20-member cross-functional analytics team from the ground up, hiring data, software, and industrial engineers to support consulting practices across North America. Served as the primary point of contact for executive escalations related to data accuracy and engineer's performance.
- Strategic Data Partnership with North America Leadership: Acted as the analytics partner for multiple IBM Services leaders across North America, developing advanced data models and Power BI dashboards to detect business health anomalies, forecast performance, and drive data-informed decisions across multiple regions.
- Process Automation & Advance Analytics Innovation: Spearheaded department-wide automation initiatives using SQL, VBA, RPA. Implemented several ETL pipelines and OLAP cubes to create data warehouses to streamline reporting capabilities. Successfully automated dozens of workflows using VSM (Value Stream Mapping) and robotic process automation (RPA), saving thousands of work hours annually.
- RCA & Forecasting Support for Executive Leadership: Led root cause analyses (RCAs) on revenue KPIs and targets, FTE utilization SLAs, and delivery forecast variances, delivering actionable insights to senior leadership that influenced strategic decisions across IBM Consulting Services.
- Performance Coaching & Talent Development: Conducted monthly 1:1s to mentor and track the development of team members against departmental KPIs and personalized career growth plans. Fostered a high-performance culture rooted in accountability, innovation, and continuous learning.

Project Manager, Hewlett Packard Enterprise (HPE) **Feb 2011 - Jul 2014**

- Led end-to-end delivery of high-visibility programs—chartering, scoping, planning, executing, monitoring, and closing—while consistently beating schedule, budget, and quality.
- Orchestrated cross-functional teams through lively weekly checkpoints, WBS-driven Gantt schedules, and MS Project critical-path tracking, boosting on-time delivery rate by 20% and maximizing resource utilization, keeping KPIs and OKRs on point.
- Translated complex data into executive-ready insights using Excel, Power BI dashboards, status reports, and executive briefings that accelerated decision cycles and ensured stakeholder alignment.

EDUCATION

MBA, Cybersecurity – Penetration Tester	**May 2019 - Sept 2023**
Certificate - FullStack Backend Python - Frontend HTML, CSS, Django	**Aug 2018 - Apr 2019**
Master of Business Administration, Project Management	**Jan 2015 - May 2018**
Bachelor of Business Administration	**Jan 2008 - May 2013**
